(54) ORGANIC MULTILAYERED ELECTROLUMINESCENCE ELEMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an organic compound other than aromatic amine as a hole transport layer of an organic EL(electroluminescence) element.

SOLUTION: This organic EL element contains an anode and a cathode and also contains a hole transport layer and an electron transport layer arranged so as to cooperate with the hole transport layer between the anode and the cathode. The hole transport layer contains an organic compound represented by the formula. In the formula, substituent groups R1, R2, R3, and R4 separately show hydrogen, 1-24C alkyl group, 5-20C aryl group or substituted aryl group, 5-24C hetroaryl group or substituted hetroaryl group, fluorine, chlorine, bromine, or a cyano group.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
